Professional Summary

Highly motivated Computer Science student skilled at designing secure systems and software development with applied knowledge and experience in artificial intelligence and data analysis. Proficient in Python, Java, C++, and Flutter web technologies. Experienced in building Healthcare Management Systems, AI Applications, and Data Science Projects.

Technical Skills

- Languages & Frameworks: C++, Java, Python, MySQL, Dart, PHP, JavaScript
- Frameworks & Technologies: Tkinter, Java Swing, Flutter, Flask, JDBC, MySQL
- AI & Data Science: Machine Learning, Statistical Analysis, NLP Basics, Model Evaluation, Data Visualization
- Concepts: Object-Oriented Programming, Secure Authentication, Encryption Basics, REST APIs
- Tools & Platforms: Git, GitHub, VS Code, NetBeans, Qt Creator, Google Cloud (AI exposure), Microsoft Azure (AI fundamentals)
- Soft Skills: Problem Solving, Team Collaboration, Technical Documentation, Time Management, Presentation Skills

Education

Bachelor of Science in Computer Science | COMSATS University Islamabad, Wah Campus
| 2023 – Present

Intermediate in Computer Science (ICS) | Mashal Degree College, Wah Cantt | 2023

Work Experience

Data Science Intern **Digital Empowerment Network (DEN)** | July 2025 - September 2025

- Performed the tasks during my virtual internship at DEN as a Data Science Intern showcasing professionalism while going above and beyond with a positive attitude. Worked effectively and consistently displaying strong initiative, skills, and creativity.

Projects

- **Clothify** – A Complete Women's Clothing E-Commerce Web Application

Clothify is a fully functional e-commerce website developed for a women's clothing brand, built with core PHP and MySQL. The project focuses on providing a smooth shopping experience for users while giving administrators full control over products and users through a dedicated admin panel.

- **CareLink** – Connected Healthcare Management System

CareLink is a multi-role healthcare management system built using Flutter and Supabase, designed to streamline communication and data management between Doctors, Patients, and Caretakers. The system focuses on appointment management, patient health tracking, and role-based access control using secure backend policies.

- **Bank Management System** – GUI-based system in C++ for managing account transactions and user data.

Developed a desktop-based Bank Management System using C++ and the Qt framework. The application supports account creation, updating, deletion, deposits, withdrawals, and balance inquiries, with data persistence handled through text files. Implemented using file handling, GUI design with Qt Designer, and input validation for user reliability.

- **Library Management System** – Java application for tracking inventory, lending, and returns.

Built a Java-based Library Management System with a graphical user interface using Swing. The system enables admin users to view issuer details, including usernames, full names, email addresses, and security questions, by dynamically retrieving data from an SQL database. Integrated JDBC for database connectivity and used JTable for real-time data display.

- **Electronic Health Record Management System**

Developed a system to digitally manage patient health records, including patient registration, medical history, diagnosis, and treatment data. The application improves data accessibility and reduces manual errors.

Certifications

- Google AI Essentials – Coursera
- AI for Everyone – Coursera
- Introduction to Generative AI – Coursera
- AI on Microsoft Azure – Coursera
- Introduction to Web Development – Coursera
- Statistical Analysis – Coursera
- JDBC (Java Database Connectivity) – Coursera
- Research Paper Writing – Coursera
- Successful Presentation – Coursera

- The Science of Success – Coursera

Campus Involvement and Volunteer:

- **ACM Student Chapter – General Member**
Participated in technical events and logistics support.
- **COMSATS Heritage Society – Décor Team Member**
Active role in student week arrangements and event décor.
- **COMSATS Literary Society (CLS) – General Member**
Engaged in literary and creative activities.

Languages

English – Fluent

German – Intermediate

Japanese _ Beginner
